New Jersey

If we want a "**NEW"**
Jersey
We HAVE to pioneer
We looked into the mirror but the **rear**-mirror
Reflects what's behind
Forward requires US to change our view
Look ahead, Look at eyes
Trying to connect
To detect
A pulse of humanity
Behind the white empty papers
That quickly lock us neatly in a box
Mama use to say, too much **screen time** will ruin your vision
"Too much screen time strengthens division"
To see clearly, we need to look outside the lines that aim to describe
The indescribable wonder of human life
Get away from the box just a moment
4 corners of a paper that corner us in
Boxes
I am **NOT** my trauma
I am whole
And as New Jersey aims with new arrows, we look at the **whole target** to find the center.
Our quiver filled with more than just ***ONE*** arrow, we seek balance.
That **IS** The **Challenge**
(Real)ationships keeps us from alien-nations
Trapped inside the construct of titles
Doctor
I'm asking you to join me in **vulnerability**
As you examine what you see, examine thee
Take a seat
As the patient or the client **I can** teach
You are a skilled professional but I am the expert on the subject matter: me.
White lab coats and gloves to keep things sterile
Sterile States can't bring forth life
New
Jersey
A State where communities can thrive
We seek balance
Homeostasis
The State in which individuals thrive,
They arrive
At a practice, An office, wait on a line
We respond
And although it *appears* safer
We **put down the paper**
And see the BEING in the human
That's how we develop new men & women
Who are **SEEN** *past* the screen.
