English, Assamese, Proficient in Medical Spanish

## PERSONAL STATEMENT

At the heart of my practice, I think of all my patients as "my children." I, myself, have two young kids. I want parents to know that, with each medication and procedure I recommend, I am trying to put myself in their shoes. I understand that it can be scary to be referred to a specialist and aim to take the time needed to explain all the details. I welcome questions from parents and want to make sure I am always providing the care your child deserves.

## LOCATIONS

Joseph M. Sanzari Children's Hospital at  
Hackensack University Medical Center  
30 Prospect Avenue, Hackensack, NJ 07601
